

Why are we and our chosen purpose

- AI has a great potential to increase efficiency and societal impact in the future mobility system and is a leading technology for innovation, economic growth, and societal change.
- Sweden has a vision to take a leading role in the development of the future mobility system for people and goods that is sustainable, safe, and available for all. Drive Sweden, CLOSER, AI Sweden and SAFER take on the challenge!
- AI Enhanced Mobility is therefore part of the transformation to accelerate the development of AI solutions in the mobility system

Our chosen path

Why, when and how should you contact us...

If you...

- Know any national or international synergies
- Would like to participate in one of our focus groups
- Want to learn more about the project and the process

Then please take contact:

ulrika.holmgren@lindholmen.se
