

TRAFIKVERKET

# Mobility as a Service

Drive Sweden Forum 7 september

Jonna Bäckström, Swedish Transport Administration (Trafikverket)

# Mobility as a service – Government assignment

- Trafikverkets Government assignment between 2019-2023
- Aims to increase the knowledge within MaaS, ongoing external analysis in Sweden and international
- Divided in different sub-project with different focus
- Final presentations to the government in December 2023

# Mobility as a service

## Common national access point

Investigate the possibility to create a national access point with harmonized technical and business-like conditions for third party retailers to sell tickets and other mobility services

## Demonstration project of an interchange node

Clarify the requirements that need to be placed on the physical and digital infrastructure at an existing interchange node to enable mobility as a service

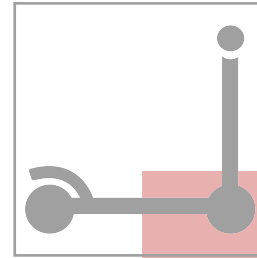

# What happend since 2019?

## Pandemic

- Reduced work commuting due an acceptable approach to remote work
- During the pandemic; More travels where made by bike, less with public transport due the restrictions

## Micromobility

- Entered our cities in a new form, and with a new business model
- Available in many cities in Sweden
- Highlights questions like "where to park"

# Thanks for your attention!
